

Recommended Nutrition Books for California WIC Family Centered Education

Suggestions on What to Look in Selecting a Nutrition Book:

1. **Positive Nutrition Messages**-message kept fairly simple; variety of foods shown, (does not encourage unhealthy foods); food shown in context with family life; humor is a plus; overall that healthy foods are tasty and fun
2. **Diverse Families**-intergenerational, multicultural, flexible gender roles, single parents including dads, or grandparents as care providers; people pictured in the books are reflective of your audience
3. **Positive Social Interactions**-characters are shown interacting positively with one another or as part of a family or community
4. **Engaging Art Work**-bold, colorful pictures work well with children; attractive color schemes
5. **Simple Story Line**-age appropriate, some suspense can make it appealing to all ages including adults, story that encourages interaction yet is relatively short or easily shortened; rhyme & repetition add interest and participation
6. **Reinforces School Readiness**-exposure to letters, counting, rhyming, opportunities for social and emotional development
7. **Other Things to Consider**- availability in Spanish or in big book format

Suggestions on How to Use Nutrition Books for Group Sharing:

- Tie the book closely to your nutrition education topic but pick a book you like (if you have free choice).
- Read slowly and take time to look at the pictures together. Sometimes, you can show how a book can be read without always reading the words.
- Practice counting together or noticing what's happening.
- Don't be afraid to add drama to your voice and body language. Have everyone guess what might happen next.
- Pause and ask open-ended questions to encourage interaction.
- Props can be handy to reinforce the story and capture the interest of children, such as pictures of food or the foods themselves, puppets or flannel boards. Give out some props and have children show it at the right time in the story.
